Weakening of parasympathetic nerve is caused by over masturbation; this nerve is responsible for holding erections and keeping semen locked for sufficient duration. Similarly person can develop sexual weaknesses like premature ejaculations or weak erections or even no erection due to weakening of parasympathetic nerve. If you loved this article and you simply would like to get more info pertaining to [generic viagra](#) kindly visit our own internet site. Once this nerve gets weak semen gets discharged during sleep by erotic dreams or slight excitements which are referred as nightfall. This whole process is done by quite delicate organs of the body and over burdening them by over masturbation gives rise to problems of nightfall or more serious sexual weaknesses.
